Aphid Treatment

Ingredients:

- 1 oz Isopropyl Alcohol
- 1 oz Blue Dawn
- 1 oz White Vinegar
- 1 gallon Water

Blend thoroughly. Pour into a hand-spray bottle. Spritz mixture onto aphids. This is designed to dry out and kill aphids. Avoid spraying directly onto caterpillars, or move the caterpillars onto plants that will not be treated. Directly spraying onto caterpillars and other beneficial insects may harm or kill them. This treatment is not known to have residual effects or be harmful to the environment.

This treatment is approved by: Monarch Watch
